As with all goods bearing our name, we authorize dealers to refund the purchase price in any case where consumers have cause for dissatis-faction. It has always been a standing principle with us to fit the lowest price for our goods consistent with good quality, and it is therefore to the interest of consumers to use our goods. It is to the interest of the public that there should be competition, but the manufacturers of Sabolio seem to think it an unpardonable crime that we should tell the public that they are charging \$6 per but for what costs them less than \$1.80, and that we should sell for \$3 an article every way its equal and in many respects superior.
